EDUCATION

Government College of Engineering and Ceramic Technology

Master of Technology in Artificial Intelligence & Machine Learning

Kolkata, India

08/2024 - 06/2026

- Average CGPA: 7.72 (till 3rd semester)

Hooghly Engineering & Technology College

Bachelor of Technology (Hons.) in Computer Science & Engineering

Hooghly, India

09/2020 - 06/2024

- CGPA: 8.87

Nimta High School

Higher Secondary Education (WBCHSE)

Kolkata, India

06/2018 - 07/2020

- Marks: 79% (Pure Science)

TECHNICAL SKILLS

Programming Languages: Python, C++

Other Skills: Object-Oriented Programming (OOP), DBMS, SQL, Django, Machine Learning

WORK EXPERIENCE

Software Development Engineer (SDE)

SalesUP

03/2025 - 08/2025

- Designed and implemented multiple automation workflows leveraging AI tools to streamline SDR operations and sales processes.
- Developed and deployed full-stack web applications (frontend & backend) using Supabase, Express.js, and other modern frameworks.

Web Developer

TransmogriFY Global Private Limited

Kolkata, India

01/2024 - 06/2024

- Developed a comprehensive CRM portal utilizing Django framework with MySQL as the backend database and Angular for frontend development.
- Implemented role-based authentication for secure access and utilized Django's SMTP protocol for email functionality.

PROJECTS

- **ResQNow (Intelligent Emergency Response System)** – Developed an AI-integrated platform in Python to optimize rural ambulance placement within a critical 15-minute 'Golden Hour' threshold. Implemented an auto-tuning DBSCAN clustering algorithm on historical traffic data to dynamically identify high-risk zones, and solved the Location Set Covering Problem (LSCP) to strategically position minimum ambulance fleets. Integrated Gemini AI to process 16 real-time temporal and environmental parameters, acting as a virtual Traffic Incharge to predict zone severity and recommend dynamic dispatch protocols. ([GitHub Link](#))
- **Fashion Recommendation System** – Developed Fashion Recommender System using ResNet50 to suggest 5 similar products, leveraging deep learning for accurate image-based recommendations, enhancing user shopping experience. ([GitHub Link](#))
- **ChatBot Using NLP** – Developed a chatbot using NLP techniques and tokenizer, enabling seamless interaction with users by understanding and processing natural language inputs, enhancing user experience and providing accurate responses. ([GitHub Link](#))

LANGUAGES

Bengali: Native or Bilingual Proficiency

English: Professional Working Proficiency
